What's happening to our NHS?

An unprecedented process of privatisation is under way in our NHS. Vital services and precious NHS resources are being handed over to the private sector, including companies run for profit for shareholders here and overseas.

- How will local health services be commissioned and what is the role of the new Barnet Clinical Commissioning Group (CCG)?
- How will the changes impact on our GP surgeries, hospitals, outpatient services, waiting times, patient choice, and NHS workers and patients?
- How can we work together to protect the NHS as a public service that is universal and free at the point of use?

Come join the discussion!
